Hardy geraniums  
Honeysuckle

### Along Fence East to West

White trillium  
Epemedium  
10 types of hostas  
Ferns  
Snapdragons (A)

# The Garden

This lush and lavish garden has been designed to create numerous garden rooms and includes brick paths, brick and paver patios, a fountain and pond, a covered area for wood storage, raised beds for annual veggies, rain barrels, a worm bin, an arbored gate and picket fence. It has been gardened organically for six years.

at 9506 13th Ave NW

“Living in this house for me has been a blessing. Everywhere I look I see nature at its best. Breakfast, lunch and dinner with the hummingbirds is a pleasure. Sometimes during the summer the back yard seems like an airport, all kinds of wild life flying around, from bees to dragonflies, smallest birds (bushtits) to big ones like hawks; all of them living together in this amazing, beautiful back yard Sanctuary. In the front yard the hummingbirds, butterflies and bees enjoy the nectars of Nature. I love watching the Chickadees, Sparrows, Blue jays and Robins... bathing in all the different bird baths.

As I wash the dishes I can look out and observe the hummingbirds chasing each other through the garden and the trees. I am thankful to have the time and this place to witness this beautiful dance of life.

When I first saw the 80 feet tall Ponderosa Pine (that I now call “Grandfather tree”) I felt him beckoning me to live in this place, and I knew this was our home!! Creating a garden has been a most enjoyable experience, one which inspired me to become a photographer, so that I could record all the different ways in which the flowers wish to be seen.”

Loxy Balthazar, homeowner

### Key

- A= self seeding annual
- B=bulb
- E=edible
- G=ground cover
- H=herb
- S=shrub
- T=tree
- V=vine

All the rest are perennials or biennials
